## PROJECTS

### Edvora – AI Education & Career Path Generator| [Link](#)

2025

Developed a career guidance platform using Gemini API to suggest profession-specific paths. Integrated aptitude and soft skill evaluations and created interactive UI for student-focused learning recommendations.

**Tech Stacks :** Reactjs, Nodejs, MongoDB, Gemini API

### SpendWise – Expense Classifier & OCR Dashboard| [Link](#)

2025

Created a full-stack expense tracking system with 94% accuracy using an ML classification model for receipt categorization. Developed React UI and integrated OCR and analytics with Node.js backend.

**Tech Stacks :** Reactjs, Nodejs, MongoDB, Logistics regression

### DebugEase – AI Code Debugger | [Link](#)

2025

Built an AI-powered code debugging tool using Groq API and Judge0 for multi-language support. Designed a system for real-time compilation, error detection, and fix suggestions with structured output using clean UI and backend design principles.

**Tech Stacks :** Reactjs, Nodejs, Groq API, Judge0 API

### Pagecraft – Book Quality Analysis | [Link](#)

2024

Built a web application that enhances the quality of textbooks and e-books through expert reviews and AI-driven content analysis, using HTML, CSS, JavaScript, Bootstrap, and NLTK. By ensuring accuracy, relevance, inclusivity, and engagement, it empowers educators and enriches the learning experience for students globally.
